PERSONAL PROJECTS

Niyon | online platform that aims to connect young coders with mentors. (07/2019 - 09/2019)

- Implemented user authentication on frontend using JWT, Redux Persist to gather user information across multiple pages and chat functionality using socket.io
- Construct and design components for authentication, chat and edit profile in React. Managing application state using Redux

Codelify | Your code snippets Library (12/2019 - Present)

- Implemented queries and mutation for Apollo Client
- Created Search functionality with match-sorter and downshift
- Setting up Context API for managing state

GeoApp | live geolocation application where users can 'pin' different locations on the map. (04/2019 - 05/2019)

- Implemented backend server from scratch using Express and GraphQL with a MondoDB database (Mongo Atlas).
- Worked with Express.js, MongoDB, GraphQL, Apollo Client, Google OAuth2, Cloudinary API, MapBox
- implemented React Context API to manage the state, building the design using material UI library in React.

EDUCATION

Full Stack Web Development & Computer Science Lambda School

01/2019 - Present

- Lambda School is a 9+ month Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum with a focus on computer science, and fullstack web development.

Master's Degree in Geographic Information System(GIS) West University of Timișoara

10/2016 - 08/2018

Degree in Economic Development & Tourism Management West University of Timișoara

2008 - 2011

SKILLS

CSS

HTML

Java

Javascript

NextJs

NodeJs

OOP

Python

ReactJs

Redux

SQL

Git

WORK EXPERIENCE

Team Lead

Lambda School, Remote

04/2019 - 08/2019

- Provided one-on-one instructional feedback to students in the web development part of their program
- Debugged student code for projects in React and Node and identified solutions to any learning blockers
- Offered feedback on student projects, code, and performance as reported to their Section Lead

Mobile Developer Intern IT-Labs RD Timisoara

05/2018 - 10/2018

- Utilized advanced functions of the Java software development kit (SDK) in order to optimize flexibility of apps to different mobile devices.
- Fixed bugs and improved application performance.
- Created Firebase database structures to integrate with Android applications and web interfaces.

Analyst - Java School

SSI SCHAEFER - Timisoara

06/2017 - 01/2018

- Applied generally accepted programming standards and techniques in Java to assure efficient program logic and data manipulation, including processing SQL Statements with JDBC
- Created HTML tables and used version control software as CVS
